

Avio Aero awarded with the Randstad Employer Brand 2023

Reputation of the brand and solidity of the company are among the reasons for the award

RIVALTA DI TORINO 11/05/2023 – Avio Aero is one of the three companies awarded with the Randstad Employer Brand 2023, the recognition assigned by Randstad on the basis of independent research which measures the level of attractiveness of Italian companies perceived by potential employees. A result that the company has achieved thanks to its positioning on: brand reputation, financial solidity and job security.

In Italy, the survey involved almost 7,000 people aged between 18 and 64 out of a sample of 150 companies. The research highlighted how work-life balance, a pleasant working atmosphere and salary are, for 2023, determining factors in choosing the company to work for.

“This recognition represents an important milestone for us. I want to thank Randstad for providing us with this snapshot of the features that make Avio Aero an ideal employer, our people who are on the front line every day determining this result and those who have shown confidence in our values and in our commitment”. declared Sandro De Poli, President of Avio Aero. “As we always reiterate, it is the continuous investments in research and development and the consolidated network with the major universities and international research centers that guarantee this company a level of technological and propulsive excellence recognized on a global scale. People and technology are the secret of our success, which is why continuing to invest in training, inclusion and attraction of new talent remains a priority”.

“Talent attraction and a work environment where inclusion and diversity thrive have always been our top priorities. This acknowledgment is an incentive to continue working to improve collaboration with universities and make it increasingly effective,” said Marilea Athanasopoulou, Senior HR Leader of Avio Aero. “This is even more necessary in this phase of strong recovery in the aeronautical sector, because the participation in new international programs brings the need to accelerate technological development”.

About Avio Aero

Avio Aero, part of the GE Aerospace business, designs, manufactures, and maintains components and systems for civil and military aviation. Today, the company provides its customers with innovative technological solutions to quickly respond to the continuous changes required by the market: additive manufacturing, rapid prototyping, as well as technologies dedicated to the production of transmissions, turbines, and combustors. The company's head office is in Rivalta di Torino, where its largest production facility is also located. Other important facilities are situated in Brindisi and Pomigliano d'Arco (Naples), with a total of over 4,300 employees employed in Italy. Abroad, it has a plant and a test center in Poland and a production and testing facility in the Czech Republic, with a total of over 900 employees. Through continuous investment in research and development and a consolidated network of relationships with major universities and international research centers, Avio Aero has developed a globally recognized level of technological and manufacturing excellence, as evidenced by the partnerships signed with the world's leading aviation companies.
